Applicant's election with traverse of Group I and the compound recited on pages 2-3 of their remarks in the reply filed on 6/1/07 is acknowledged. The traversal is on the ground(s) that Group I should be classified in class 514 rather than 526 because claim 526 concerns methods of making and because 424 is considered an integral part of class 514, there is no serious burden to search. This is not found persuasive because, although subclasses 59-71 in class 526 may concern methods of making, succeeding subclasses from 72 onward concern compositions. Applicants also traverse the election of species requirement, arguing that claim 1 is a bridging claim encompassing all the species. However, once applicants elect, claim 1 will only be considered insofar as it includes that species.

The requirement is still deemed proper and is therefore made FINAL.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Application/Control Number: 10/762,914

Art Unit: 1616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 5 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 10-11, 13 of U.S. Patent No. 6110916. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims encompass the instant claims.

Claims 1-3, 5 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 (b) and 3, "non-neighboring neighboring" is indefinite.

No claims allowed.
